CONFIRMATION NUMBER: EL975934

DATE OF SUBMISSION: June 22, 2018

Question 7:

Radars are to be installed on an aerostat and will flown individually and in combination to demonstrate and assess performance and capabilities against maritime and ground-based targets. Operation of electro-optic, acoustic, and other sensors will also be evaluated during these tests with the goal of developing effective intelligence, reconnaissance, and surveillance (ISR) sensor suites.
